

	10/7/2023					11/7/2023					12/7/2023					13/7/2023					14/7/2023				
Room	09:00-10:30	11:00-12:30	12:30-14:15	14:15-16:15	16:45-18:15	09:00-10:30	11:00-12:30	12:30-14:15	14:15-16:15	16:45-18:15	09:00-10:30	11:00-12:30	12:30-14:15	14:15-16:15	16:45-18:15	09:00-10:30	11:00-12:30	12:30-14:15	14:15-16:15	16:45-18:15	09:00-10:30	11:00-12:30	12:30-14:15	14:15-16:15	16:45-18:15
1	S2: Merac symposium			PLENARY SESSION	S2: Merac symposium	S2: Merac symposium		S2: Merac symposium		S2: Merac symposium	S13: Stars, magnetic activity, and circumstellar environments				S13: Stars, magnetic activity, and circumstellar environments	S13: Stars, magnetic activity, and circumstellar environments				S13: Stars, magnetic activity, and circumstellar environments	SS29: From dormant to ultra-luminous compact objects in X-ray binaries				SS29: From dormant to ultra-luminous compact objects in X-ray binaries
2	S3: Gaia		SS3: James Webb Space Telescope Community Session		S3: Gaia	S3: Gaia				S3: Gaia	S10: In the new era of cosmological surveys				S10: In the new era of cosmological surveys	S10: In the new era of cosmological surveys				S10: In the new era of cosmological surveys	S4: Machine Learning prospective in Astrophysics				S4: Machine Learning prospective in Astrophysics
3	SS5: The Solar System				SS5: The Solar System	SS1: Africa-Europe collaborations towards the impact of 2024 IAU GA on astronomy developments		SS1: Africa-Europe collaborations towards the impact of 2024 IAU GA on astronomy developments		SS1: Africa-Europe collaborations towards the impact of 2024 IAU GA on astronomy developments	SS36: The hitchhiker's guide to astronomy education, public outreach and communication		SS36: The hitchhiker's guide to astronomy education, public outreach and communication		SS36: The hitchhiker's guide to astronomy education, public outreach and communication	S9: Gravitational lensing in the eyes of the James Webb Space Telescope				S9: Gravitational lensing in the eyes of the James Webb Space Telescope	S9: Gravitational lensing in the eyes of the James Webb Space Telescope				S9: Gravitational lensing in the eyes of the James Webb Space Telescope
4	SS2: Gravitational wave sources in gas-rich environments		LS8: The GAMA-BFROST legacy survey		SS2: Gravitational wave sources in gas-rich environments	SS13: Angular momentum evolution of star-disk systems		LS16: The hot phase of the circumgalactic medium (hot CGM)		SS13: Angular momentum evolution of star-disk systems	SS9: The universe in 3D				SS9: The universe in 3D	SS12: Planets not orbiting main sequence stars				SS12: Planets not orbiting main sequence stars	SS37: From planets to black holes				SS37: From planets to black holes
5	SS6: Formation of planetary systems				SS6: Formation of planetary systems	SS25: Star formation scaling relations across physical scales and cosmic time				SS25: Star formation scaling relations across physical scales and cosmic time	SS27: The Young Milky Way		LS13: Science case and overview of the North (MSE) and South (WSE) Spectroscopic Survey Telescopes projects		SS27: The Young Milky Way	SS14: Relativistic Magnetospheres				SS14: Relativistic Magnetospheres	SS7: Dust lifecycle		LS1: Circumbinary disks across all binary systems		SS7: Dust lifecycle
6	SS16: First science results from WEAVE, the WHT's next-generation spectroscopic survey facility				SS16: First science results from WEAVE, the WHT's next-generation spectroscopic survey facility	SS30: Software and Toolkits for the Lifetime of a Survey and Beyond: Computational Workflows from Observations to Legacy Archives		SS30: Software and Toolkits for the Lifetime of a Survey and Beyond: Computational Workflows from Observations to Legacy Archives		SS30: Software and Toolkits for the Lifetime of a Survey and Beyond: Computational Workflows from Observations to Legacy Archives	SS8: Black-hole accretion discs 50 years on				SS8: Black-hole accretion discs 50 years on	SS40: The mm transient sky: present opportunities and perspectives				SS40: The mm transient sky: present opportunities and perspectives	SS18: The outer Galaxy as a template of low-metallicity environments		LS14: The Renaissance of Optical Intensity Interferometry		SS18: The outer Galaxy as a template of low-metallicity environments
7	SS24: The dusty inner regions of active galaxies in the JWST era	LS15: Magnetars as central engines across the Universe			SS24: The dusty inner regions of active galaxies in the JWST era	SS34: Early Career Astronomers and their supporters	SS34: Early Career Astronomers and their supporters		PLENARY SESSION	SS34: Early Career Astronomers and their supporters	SS31: Astronomy in the era of Large Satellite Constellations	SS31: Astronomy in the era of Large Satellite Constellations		PLENARY SESSION	SS31: Astronomy in the era of Large Satellite Constellations	SS30: Reconstructing the Assembly History of Galaxies	LS10: Scientific Writing for Astronomers		PLENARY SESSION	SS30: Reconstructing the Assembly History of Galaxies	SS28: Understanding the connection between nuclear star clusters, black holes and galaxy evolution	SS28: Understanding the connection between nuclear star clusters, black holes and galaxy evolution		PLENARY SESSION	SS28: Understanding the connection between nuclear star clusters, black holes and galaxy evolution
8	S8: Early assembly of galaxies with JWST spatially resolved spectroscopy and photometry				S8: Early assembly of galaxies with JWST spatially resolved spectroscopy and photometry	S8: Early assembly of galaxies with JWST spatially resolved spectroscopy and photometry				S8: Early assembly of galaxies with JWST spatially resolved spectroscopy and photometry	SS22: Coming out of darkness				SS22: Coming out of darkness	S7: One year of JWST				S7: One year of JWST	S7: One year of JWST				S7: One year of JWST
9	S12: Breaking down the AGN frontiers				S12: Breaking down the AGN frontiers	S12: Breaking down the AGN frontiers				S12: Breaking down the AGN frontiers	SS19: The importance of relations in galaxy evolution				SS19: The importance of relations in galaxy evolution	S6: Baryonic feedback, magnetic fields and cosmic rays in galaxy evolution				S6: Baryonic feedback, magnetic fields and cosmic rays in galaxy evolution	S6: Baryonic feedback, magnetic fields and cosmic rays in galaxy evolution				S6: Baryonic feedback, magnetic fields and cosmic rays in galaxy evolution
10	SS21: Unveiling the secrets of chemically peculiar stars		SS21: Unveiling the secrets of chemically peculiar stars		SS21: Unveiling the secrets of chemically peculiar stars	SS11: Towards the next generation exoplanet detection and characterisation: Implication for exoplanet models and demographics		LS7: The ESO Very Large Telescope Interferometer window into the universe		SS11: Towards the next generation exoplanet detection and characterisation: Implication for exoplanet models and demographics	SS35: Supermassive Black Hole Transients and Their Host Galaxies		SS35: Supermassive Black Hole Transients and Their Host Galaxies		SS35: Supermassive Black Hole Transients and Their Host Galaxies	SS17: The Last Kiloparsecs				SS17: The Last Kiloparsecs	SS15: Cosmic filaments in the Universe		SS15: Cosmic filaments in the Universe		SS15: Cosmic filaments in the Universe
11	SS32: Multiwavelength view on extragalactic jets	SS32: Multiwavelength view on extragalactic jets			SS32: Multiwavelength view on extragalactic jets	S11: Stellar interactions		S3: Gaia		S11: Stellar interactions	S11: Stellar interactions				S11: Stellar interactions	S5: From stellar variability to stellar structure and evolution		LS9: Betelgeuse and other runaway stars		S5: From stellar variability to stellar structure and evolution	S5: From stellar variability to stellar structure and evolution		LS12: On the road to the SKAO		S5: From stellar variability to stellar structure and evolution
12	SS41: The Extreme Universe with CTAO		SS38: European Forum of Astronomical Communities		SS38: European Forum of Astronomical Communities	SS39: Sci-Art		SS39: Sci-Art		SS19: The importance of relations in galaxy evolution	SS20: Reconstructing the Assembly History of Galaxies	SS33: All the colours of the spectrum: enhancing gender balance and LGBTQIA+ Inclusivity in Astronomy	SS33: All the colours of the spectrum: enhancing gender balance and LGBTQIA+ Inclusivity in Astronomy		SS33: All the colours of the spectrum: enhancing gender balance and LGBTQIA+ Inclusivity in Astronomy	SS26: Superluminous supernovae near and far: recent breakthroughs and future prospects		LS11: Evolving Observations of Binary Stars Reveal Photoplanetary Discs, Circumbinary Planets, Transients, and Mergers		SS26: Superluminous supernovae near and far: recent breakthroughs and future prospects	SS23: Frontier of Interferometric Imaging from Radio to Optical				SS23: Frontier of Interferometric Imaging from Radio to Optical
13	S1: Multiwavelength polarization	LS8: Universe @ ERC			S1: Multiwavelength polarization	S1: Multiwavelength polarization		LS4: The ESA Science programme		S1: Multiwavelength polarization	SS4: Science with the Virtual Observatory		LS5: The ESA Space Science Archives		SS4: Science with the Virtual Observatory	S4: Machine Learning prospective in Astrophysics		LS3: Getting the most out of ESO data		S4: Machine Learning prospective in Astrophysics	SS10: The edge of galaxies from field to cluster environment		LS2: Event Horizon Telescope: Beyond the First Images of M87 and Sgr A*		SS10: The edge of galaxies from field to cluster environment
